

My phone is for me and my families personal, private use! If I wanted to talk to anyone over my personal and private phone line, I would have called them first. This is a continued invasion of privacy into the lives of our country's citizens. Enough is enough. I feel that I should be allowed to charge each and every unsolicited phone caller, a minimum charge of \$50.00, for each and every call. That in itself would give unsolicited callers something to think about!
